Tommy K.W. **Ho**

Greater Seattle Area, WA

(425) 240-5953 | kuanweih@uw.edu | thanatine.github.io | Thanatine | tommy-kuan-wei-ho

Motivation and Interest

Seeking for software engineer intern position in 2020 winter / 2021 spring in a prestigious institution. Interested in technical perspectives of product development and technical solutions to real life problems.

Education

University of Washington (UW) *Seattle, WA*

Computer Science, M.Sc. in Technology Innovation (MSTI) *Sep. 2019 - Mar. 2021*

National Tsing Hua University (NTHU) *Hsinchu, TW*

B.Sc. in Computer Science *Sep. 2014 - Jun. 2018*

- GPA: 3.4/4.0
- Selected Relevant Coursework: Graphics Programming and Applications, Large-Scale Machine Learning, Compiler Design, Computer Graphics, The Cutting Edge of Deep Learning, Natural Language Processing Lab

Professional Experience

NVIDIA *Taipei, TW*

AI Developer Technology Engineer Intern *Aug. 2018 - Jan. 2019*

- Conducted research on object detection and semantic segmentation methodologies on current and next-generation GPU architectures
- Presented research and projects result to software engineers and solution architects on weekly basis
- Collaborated with senior software engineer to provide best AI solutions using GPUs on current and future problems which key customers are solving
- Refined the training and inference workflow of deep learning with NVIDIA platform such as DALI and TensorRT. Achieved 50% acceleration on data preprocessing stage on on DGX-2

Elsa Lab, National Tsing Hua University *Hsinchu, TW*

Research Assistant (Supervised by Prof. Chun-Yi Lee) *Feb. 2018 - Jan. 2019*

- Conducted research on video segmentation, robotics and deep reinforcement learning
- Responsible for methodology design, experiments implementation, result evaluation, editing and writing papers aimed at international conferences and journals

Alfred Labs Inc. *Taipei, TW*

Data Science and Machine Learning Intern *Dec. 2017 - Jun. 2018*

- Conducted research on deep learning frameworks (e.g. TensorFlow Lite, TensorFlow Mobile, CoreML) for mobile phones, and computationally efficient image classification, object detection, and face recognition methodologies implemented under those frameworks
- Conducted on cutting-edge deep learning frameworks and toolkits, such as Intel Movidius Neural Compute Stick and Google AIY Vision Kit, designed for mobile embedded devices (e.g. Raspberry Pi)
- Architected a pilot project of deploying smart surveillance system with face recognition neural network on Raspberry Pi, which is improved 80% on efficiency and scalable compared to previous prototypes

High5.ai *Taipei, TW*

Software Developer Intern *July. 2017 - Oct. 2017*

- Conducted research on AI chatbot's production efficiency, semantic analysis and text generation methodology
- Delivered an upgraded scalable AI chatbot with inference speed 10 times faster and a word embedding covering 98% of domain knowledge
- Solved technical issues on AWS and maintained the operation of the service

Publication

A Distributed Scheme for Accelerating Semantic Video Segmentation on An Embedded Cluster *IEEE International Conference on Computer Design (ICCD)*

Hsuan-Kung Yang*, Tsu-Jui Fu*, Po-Han Chiang†, **Kuan-Wei Ho**†, Chun-Yi Lee *2019*

- ICCD is a top conference in computer system
- Full paper oral presentation
- * † indicate equal contribution

Visual Relationship Prediction via Label Clustering and Incorporation of Depth Information

1st Person in Context (PIC) Workshop, European Conference on Computer Vision (ECCV)

Hsuan-Kung Yang, An-Chieh Cheng*, **Kuan-Wei Ho***, Tsu-Jui Fu, Chun-Yi Lee

2018

- ECCV is a top conference in computer vision
- * indicates equal contribution

Awards and Honors

2018 **2nd Place,** ECCV 2018 Workshop and Challenge: Person In Context (PIC) *Munich, DE*

2017 **3rd Prize,** Final Project Competition of NTHU The Cutting Edge of Deep Learning *Hsinchu, TW*

Skills

Programming Languages, Frameworks, Tools and Languages

Programming Languages, Frameworks, Tools and Languages

- **Programming Languages:** C, C++, Python, Java, shell scripting
- **Frameworks and Tools:** Git, Flask, OpenGL, Android Studio, LaTex
- **Data Science and Machine Learning Frameworks:** NumPy, Pandas, Gensim, OpenCV, NLTK, Scikit-learn, Keras, TensorFlow, PyTorch
- **Toolkits:** Raspberry Pi, Google AIY Vision Kit, Intel Movidius NCS
